Helping to deliver safer, more effective resident care

At Frontier Medical Group, we partner with care homes to deliver innovative, clinically effective pressure area care solutions that support CQC compliance, improve resident quality of care, and enhance operational efficiency.

Our solutions are designed to:

- Prevent pressure damage and reduce resident discomfort
- **Support CQC-rated safe and effective care**
- Reduce reliance on costly powered mattresses
- **Improve the quality of life for residents, including those with complex needs, dementia, and in palliative care**
- Free up staff time, reduce manual handling risks, and improve care efficiency

Aligning with CQC Expectations

The Care Quality Commission expects providers to deliver safe, person-centred, and responsive care. Our pressure area care solutions support your team in achieving these standards by helping prevent avoidable harm, improve clinical governance, and demonstrating best practice in pressure ulcer prevention and management.

Why Frontier Medical Group?

With over 25 years of experience, we understand the challenges faced in pressure area care in care homes. Whether you are supporting residents with reduced mobility, at great risk of pressure damage or those with end-of-life needs, our clinically effective solutions offer:

- Prevention-focused PAC for everyday needs
- **Specialist support surfaces for residents with high or complex needs**
- Cost-effective alternatives to traditional dynamic systems
- **Ease of use for overstretched care teams**
- Improved staff wellbeing and care efficiency

Automated Lateral Resident Turning System

Toto Cradle automates the regular turning of residents, relieving staff of physically demanding repositioning intervals and providing consistent, and controlled 24/7 pressure redistribution.

- Supports compliance with pressure ulcer prevention guidance
- Ideal for residents receiving palliative and end-of-life care
- Reduces strain on caregivers and supports care efficiency
- Improves dignity, comfort and sleep quality
- Fully programmable for personalised care

An Evolution in Hybrid Mattress Technology

A non-powered, reactive air and high specification foam hybrid mattress combining comfort, stability, and effective pressure redistribution.

- Designed for profiling beds in care homes
- Delivers high-levels of immersion and envelopment with Repose at its core
- Reduces the risk of skin breakdown and ulceration
- Moisture-vapour permeable, water-resistant, easy-clean cover
- Ideal for all levels of risk, including residents with existing damage as part of a package of care

repose®

Pressure Redistribution and Reduction Support Surfaces

Clinically Proven, Cost-Effective, Easy to Use

Repose® Cushion

Portable pressure redistribution for static chairs and riser recliners.

- Lightweight, comfortable, and perfect for use throughout a care home
- Machine washable polyurethane cover complies with infection control policies

Repose® Wedge

Effective heel offloading with lower leg elevation.

- Secures safely for restless or confused residents
- Suitable for those with foot drop, tilted positions, or wider calves

Repose® Contur

Specialist support surface for riser recliner chairs.

- Full-body pressure redistribution, supporting sacrum, heels, scapulae, and occiput
- Secures easily to existing riser recliner chairs, making it ideal for residents sitting for extended periods

25 Years of Evidence

Backed by 25 Years of Clinical Evidence, Trusted by Care Teams

The Repose range is supported by over two decades of clinical evidence and Randomised Controlled Trials (RCTs). All products utilise a combination of unique materials and Smart Valve Technology to provide consistent, low-pressure, reactive air redistribution, helping to reduce the incidence of pressure ulcers, safely and cost-effectively as part of a package of care.

- Over 25 years of real-world clinical experience in both acute and community settings
- **Low lifetime cost of ownership**
- Simple to clean, store, and reuse

Helping You Meet CQC Standards. Every Day

The CQC's framework stresses the importance of safe and effective care. By partnering with Frontier Medical Group, care homes can demonstrate proactive pressure ulcer prevention, safer resident repositioning practices, and better outcomes for high-risk residents. Whether a care home is aiming to maintain high standards or improve their inspection rating, our pressure area care products can help meet, and exceed, expectations.

Let's Improve Pressure Area Care Together
